

## GENERAL HEALTH CHECK UP

**THEME:** General Health Check- Up

**REPORT:** HEALTH CHECK UP HELD IN SCHOOL

**DATE:** May 8 and May 9, 2023

**CLASSES:** Nursery to II

### EVENT REPORT

Health Check-up is an integral part of every child's development. It monitors the various growth indices, improves the health of students and creates awareness of parents.

The General Health Check-up was conducted in the school by the School Doctor, Dr. Naina and Nurse Monica on May 8 and 9, 2023. During this period the height and weight of every student was recorded. The medical team also examined the skin, nails, ear, nose, and throat of every child to rule out any kind of indication of a medical problem. As part of the check-up, the heart and lungs were auscultated and the abdomen was palpated to trace abnormality, if any. The details with special advice wherever required were recorded in the Annual Report Health Card, which will be shared with the parents.
