

G.D GOENKA PUBLIC SCHOOL, SARITA

ANIMALS AROUND US

THEME: Animals around Us

REPORT: NURSERY CONCEPT PRESENTATION

DATE: March 16 and March 17, 2017

There are millions of animal species to roam the Earth, therefore it is important to be able to identify them and understand about their habitats and characteristics so that we can coexist with them. Our little Goenkans of Nursery learnt about various types of animals throughout the year in their classrooms and presented before the parents a Concept Presentation on the topic 'Animals' on March 16 and March 17, 2017. The students presented facts about animals through a role play, song and dance on the various foot tapping animal songs. The purpose behind the event was to give a glimpse to the parents about how all subjects are interlinked and taught in a normal classroom. In view of the same the students shared their knowledge about the various segregations in the animal kingdom, their habitat, young ones, number work and the language element was added to event. The presentation was designed to be an interactive and fulfilled session as children asked questions from the parents too.

The event concluded with the little Goenkans requesting all present to take a pledge towards safeguarding the animals on the earth.
