## EVENT REPORT

**THEME:** Earth Day

**REPORT:** Earth Day Celebration

**DATE:** Friday, 26<sup>th</sup> April, 2019

**CLASS:** Nursery to II

### EARTH DAY CELEBRATION

Earth is believed to be the only planet which nurtures life in the “known universe”. In fact, it is the only habitable planet which has an abundance of air, water, plants, animals and human being. It is, however, very unfortunate that the condition of earth is fast deteriorating due to unfriendly activities practiced by humans. The vulnerable earth could be heading for a disaster if the human race does not unite to save it. The Earth Day is observed every year on 22<sup>nd</sup> April not only to remind everyone but to sensitise every child to contribute their bit to save the mother earth from further disintegration.

To reinstate our responsibilities toward mother Earth, a special assembly was conducted in GD Goenka Sarita Vihar on Thursday, April 25, 2019, which spread the message that it is the topmost priority to take care of the planet and protect its valuable resources from various pollutants for generations to come.

All students from Nursery to II actively participated in the Earth Day special assembly conducted by II-C. The children voiced their views on saving the planet through dialogues and play. Their creative expression was exhibited through an interesting skit which directed our mind towards achieving the global aim of saving the earth. Thereupon, they showcased a foot-tapping song and dance that touched the hearts. Numerous art and craft activities were organized in each class where children participated enthusiastically. One such craft work was done through torn-paper art collage to draw the earth. The purpose of this activity was to inspire students to make the earth a better place to live

and raise awareness to protect the environment. The assembly concluded through a strong message by the school Principal, Ms. Seema Sahay to safeguard our environment by planting a sapling by each and every child of the school. She added, “Don’t just protect the environment of the earth but create the earth where the environment doesn’t need protecting.”
