

REPORT: FIELD TRIP

VISIT TO: PARLE G Toffee Factory

DATE: May 11 & 12, 2026

CONDUCTED BY: G.D. Goenka Public School, Sarita Vihar

ATTENDED BY: Classes I & II

EVENT REPORT

The students of **G.D. Goenka Public School, Sarita Vihar, Classes 1 and 2** were provided with a wonderful opportunity to visit the Parle Products factory in Noida as part of an educational trip. The visit proved to be an enriching and exciting learning experience for the students.

Approximately 300 enthusiastic students of class 1 and 2 were at first welcomed by the staff and then seated in an auditorium where they were shown informative and animated videos about the manufacturing process of various Parle products. The students engagingly watched how the globally popular products such as **Parle-G** biscuits, chips and candies like Kismi and Melody toffees are prepared, packaged and distributed using large machines and advanced technology in big factories.

The students were also shown an educational movie focusing on environmental awareness, focusing on being careful about disposing off the wrappers and packets of the products after usage. Through the animated presentation, they learned about the importance of reducing pollution, minimizing the use of plastic and following the three Rs – Reduce, Reuse and Recycle – to help protect the environment.

Later, the students were taken around a small manufacturing unit where they observed how toffees are produced and how the packaging process for chips and toffees is carried out. Although photography inside the production area was not permitted, the students were thrilled to witness the large machines and the factory setup closely.

As a token of love and appreciation, the students were also given packets of Parle-G biscuits and toffees as takeaway gifts, which made them extremely happy and excited.

Once back in school the students recapitulated their learning through a follow up worksheet based on the field trip.

Overall, the educational trip was informative, enjoyable and memorable for all the students. It provided them with practical knowledge about food production, packaging, environmental responsibility and teamwork in industries. It also, in days where the foreign brands flood the markets and tempt the consumers, inculcated a respect for the legendary Indian brands and the Indian products.
