Career counseling program preps city students for higher education

In an endeavour to nurture individuals who are goal-oriented and aware of their surroundings, GD Goenka Public School, Sarita Vihar, has introduced the career counseling program – Udaan. The school's management says, "Offering a gateway into the future, with the program we provide avenues for our students for higher education. The year 2024 provided multiple opportunities to our students by way of sessions and workshops, meeting industry experts, learning about study options in India and abroad."

Noting the prospects of the program, the team says, "The career fair allowed students to explore the study options with various foreign universities, clarifying their doubts about logistics, the application process and prior preparation required. School alumni, who are studying in the world's best colleges like the University of British Columbia and Delhi University, apprised their juniors about the key skills required to learn and chase one's dreams. Internships provide a bridge between school education and life at university and further

employability. Students of our school took up internships like the Young Scholar's Program at the

Ashoka University, interned with Scholastic and Anon Global Foundation on various managerial and literary

"The year 2024 provided multiple opportunities to the students," noted the school's management

skills. A few also took up the Youth Entrepreneurship Bootcamp and learnt the nuances of establishing start-up through project-based learning. About how the program will benefit the students, the team adds, "Such pragmatic and unique opportunities help children realise their inner strength and give them a conducive environment to evolve."
