TREEPUBLIC – Preserving the Nature

BIG FM recently announced its campaign 'TreePublic' in order to increase the level of Greenery across cities in the country. The radio network is extending its reach in order to spread awareness about the plantation of trees and its importance in the society.

The members of the radio station visited G.D. Goenka Public School, Sarita Vihar, to enlighten the students about the need to plant more trees.

The students of Classes II and III had a fun filled interaction with RJ 'Khuraphati Nitin' about the increasing levels of pollution and aiming towards sustainable development.

Special pencils that had 'seeds' towards their rear end were given to each child in order to encourage them to take an initiative towards 'Each one plant one'.

The intent behind this effort was made fruitful by letting the children discuss various measures to create a healthy environment.
